LASER

CAD

Illustration of Design

Once the model is created in the CAD program, an illustration of the design can be made. Sophisticated software creates a virtual lighted environment and calculates the appearance of different materials, such as metal and even transparent gemstones.

OROTIG LASER RR WRITER

The LASER Writer model "RR-70" has been designed with the specific intent to mark and cut by LASER metal plates spending the least needed time.

3D PRINTER

ProJet 3600 3D Systems' Multijet Printing (MJP) process creates precise plastic parts that are ideal for our unique pieces.

“ In every motion that our professionals do, we strive to reach a state of perfection to innovate the piece that you deserve to suit every dear hearted occasion”

SHARED VISION

Maintaining practices that build long-term relations between the company and customers.
